

July 14th, 2023

The Restriction of Hazardous Substances or RoHS restricts the use of specific hazardous materials found in electrical products. Directive 2015/863, known as RoHS 3, was published in 2015 by the EU and adds four additional restricted substances (phthalates) to the list of six.

- Lead (Pb): < 1000 ppm</li>
- Mercury (Hg): < 1000 ppm</li>
- Cadmium (Cd): < 100 ppm</li>
- Hexavalent Chromium: (Cr VI) < 1000 ppm</li>
- Polybrominated Biphenyls (PBB): < 1000 ppm
- Polybrominated Diphenyl Ethers (PBDE): < 1000 ppm</li>
- Bis(2-Ethylhexyl) phthalate (DEHP): < 1000 ppm
- Benzyl butyl phthalate (BBP): < 1000 ppm</li>
- Dibutyl phthalate (DBP): < 1000 ppm</li>
- Di isobutyl phthalate (DIBP): < 1000 ppm

Gibbs Interwire, through due diligence, requires that all its suppliers be RoHS compliant. To the best of our knowledge, material supplied from Gibbs Interwire is in compliance with the RoHS 3 regulation.

If you have any questions, or need additional information, please contact us.

## Sincerely,

George Reith

Vice President of Corporate Services
